MIFEPREX TABLET:

- Mifeprex inhibits the action of a hormone that is required to keep a pregnancy going.
- It holds Mifepristone 200mg as an active element.
- Order Mifepristone Abortion Pill is a medication that is used to end an early pregnancy that is less than 70 days (10 weeks) after the first day of your last menstrual period.
- Buy Mifeprex Abortion Pill online which is used in conjunction with a drug called Misoprostol (Cytotec) tablet.

DOSAGES OF *MIFEPREX*:

- On Day 1, take 200 mg of Mifeprex pill orally.

CONSIDERATIONS IN *DOSING*:

- [Order Cheap Mifeprex Abortion Pill online](https://daynighthealthcare.com/), in combination with Misoprostol pregnancy termination tablet, is indicated for the medical termination of intrauterine pregnancy up to 70 days gestation.

- Day 1: Under physician supervision, take 200 mg of Mifepristone pill orally as a single dose.
- Days 2 and 3: Misoprostol 800 mcg tablet in the cheek (buccally) once as a single dose; must be given at least 24 hours and up to 48 hours after the Mifepristone dose on day 1.
- The first day of the last menstrual period is used to determine whether or not a woman is pregnant.
- If the pregnancy's duration is unknown or ectopic pregnancy is suspected, an ultrasonographic scan should be performed.
- Before starting treatment, remove any intrauterine devices (IUDs).
- Discuss with the patient an appropriate location for her to be when she takes Misoprostol Abortion Pill online, keeping in mind that expulsion can start as soon as 2 hours after administration.
